Swallow 1646.

An Almanacke, for the yeere of our Lord God 1646.

Being the second after Bissextile or Leap-yeare, and from the Worlds Creation 5678.

Calculated properly for the famous Universitie and Town of *Cambridge*, where the Pole is elevated 52. degrees and 17. minutes above the Horizon.

And God said, Let there be lights in the firmament of the heaven, to divide the day from the night: and let them be for signes and seasons, and for dayes and yeares. Gen. 1. 14.

LONDON
Printed by *John Dawson* for the Company of *Stationers*.

The common notes and moveable Feasts for this present yeare 1646. according to the Computation used in the Church of England.

BIBL CANT ACAD

The beginning and ending of the Terms.

Hilary Term begins *January* 23. and ends the twelfth of *February*.

Easter Term begins *April* 15. and ends the eleventh of *May*.

Trinity Term begins *May* 29. and ends the seventeenth of *June*.

Michaelmas Term begins *October* 23. and ends the twenty eighth day of *November*.

A Computation of the Six Ages of the world, and of the number of yeares expired with this yeare of our Lord 1646.

From the

Creation unto the Flood	1656	First Age.
Creation till this yeare	5678	
Flood till this yeare	4022	
Flood to Abrahams birth	353	Second Age.
Birth of Abraham till this yeare.	3669	
Birth of Abraham till Davids time or Reigne	941	Third Age.
Reigne of David till this yeare	2728	
Reigne of David till the Captivity began	476	Fourth Age.
Captivity till this yeare	2252	
Captivity till the birth of Christ	606	Fifth Age.
Birth of Christ till this yeares end	1646	

The Sixth Age beginneth at the birth of Christ, and hath continued 1645. yeares compleat, and is now (according to the common account of Christs birth) running on in the 1646. yeare thereof: which is also the yeare of the World 5678. This Age is called in many places of Scripture, the Last Age, and the Last of Times. See Heb. 1. 1. 1 Pet. 1. 20. 1 John 2. 18.

The natures of the 7. Planets.

THem that we call the 7. Planets, are Saturne, Iupiter, Mars, Sol, Venus, Mercury, Luna.

1. ♄ Saturne is cold and dry, stirres up and increaseth melancholy.
2. ♃ Iupiter is temperately hot and moist, worke most upon sanguine complexions, stirring up and increasing that humour.
3. ♂ Mars, through his heat and immoderate drinesse, stirres up and increaseth choler; and so, often proves an accidentall cause of brawlings, fightings, warres, and the like, besides such sicknesses as may come by the superabundancy of that humour.
4. ☉ Sol is moderately hot and dry, greatly cherishing all kind of creatures.
5. ♀ Venus is cold and moist, but it is in a temperate manner: and as for her operation it is seen most in flegmatick complexions.
6. ☿ Mercury is said to be dry in respect of h's own nature; but joyned to any of the other Planets, hee puts upon him their natures, and workes as they worke.
7. ☽ The Moon shee followes next, and is well enough known to be the mistresse of moisture.

Ianuary hath xxxj. dayes.

New moone the 6. day, 39 min. past 11 at night.
First quarter the 14 day, 6 min past 2 after-noone.
Full moon the 21. day, 4 min. past 6 in the morning.
Last quarter the 28 day, 50 min. past 1, after-noone.

SWALLOW,

The latter part of this Almanack for the yeare Of our Lord God, MDCXLVI.

Being the second after *Bissextile* or *Leap-Year*, and from the Conquest of *England* by Duke *William*, 580.

Wherein

The day and houre of the Sunnes entrance into the foure Cardinall Signes is shewed, the Eclipses declared, and other things related, fit for such a Book, and worthy of observation.

Qui sapit, ille animum fortunæ præparat omni,
Prævisumque potest arte levare malum.

***

LONDON.

The Characters of the Planets, &c.

1 ♄ *Saturne*, His houſes, *Capricorne* and *Aquarius*.
2 ♃ *Jupiter*, His houſes, *Sagittarius* and *Piſces*.
3 ♂ *Mars*, His houſes, *Aries* and *Scorpio*.
4 ☉ *The Sun*, His houſe is *Leo*.
5 ♀ *Venus*, Her houſes, *Taurus* and *Libra*.
6 ☿ *Mercury*, His houſes, *Gemini* and *Virgo*.
7 ☾ *The Moone*, Her houſe is *Cancer*.

The Dragons head; ☊
The Dragons tayle, ☋

And note that ſuch or ſuch a Signe is called the Houſe of ſuch or ſuch a Planet; becauſe their Dominion is greater there, then elſe-where; and ſo it is alſo for the houſes of the Heavens, when the Sphear is divided into twelve parts.

The day and houre of the Sunnes entrance into the foure Cardinall signs this present yeare, 1646.

First of the Spring.

THe Cardinall signs, are *Aries*; *Cancer*, *Libra*, and *Capricorne*, being as it were the hinges on which the yeare hangeth, and by which it is divided into foure quarters.

These quarters among the Jewes were called *Tekuphas*, or *Conversiones anni*: two of which fall into the *Equinoxes*, when the dayes and nights are equall; and two into the solsticiall points, wherein there is as it were *Solis statio*, because for some dayes together the sun seemeth to stand still, the dayes not sensibly perceived either to lengthen or shorten. The late Rabbins of the Jewes, doe (most of them) begin the yeare from Autumne, as from its naturall head: but the old christian Fathers of the Church reckon from the spring. The signe with which this quarter enters is *Aries*, into whose first minute, the sun commeth this year on the tenth day of March about 9 a clock in the morning, 21 degrees and 4 minutes of *Gemini* then ascending, *Iupiter* is in the first house, and *Mercury* Lord of the Ascendent; *Mars* and *Mercury* both in the 10 house; in *Pisces* the house of Jupiter; which shewes that they then have a mutuall reception into one anothers houses: the sun is in *Aries* the house of *Mars*; and *Luna* in *Taurus* the house of *Venus*, both in the eleventh house, and not far distant; in the 12 house are the *Moon*, and *Venus*, both of them in *Taurus* the house of *Venus*; and almost in a perfect conjunction. And this much for the spring.

Of Summer.

The next quarter is Summer, the Cardinall ſigne belonging to it is Cancer, into which the Sunne entreth this yeare on the 11 day of June, very neare to one a clock in the afternoon. The weather of this quarter is various, yet agreeable with the ſeaſon of the yeare; as in the months in the Almanack part of this quarter you may therein find mentioned. Summer in the Germaine tongue, is ſaid to be Summer that is, *Plus Solis*, or more Sun then at other time.

Of Autumne.

The next after Summer is Autumne, his ſigne is Libra, into which the Sun enters this yeare upon Sunday the 13 day of September at 40 min. paſt 3 a clock in the morning. For the weather it is like to be ſeaſonable enough, according to the ſeaſon, for which I refer you to the Almanack.

This quarter takes his name from the Latine word *Autumno*, which ſignifieth to make ripe. Or elſe it is *Autumne à bonorum auxu augmentatione*, from the increaſe of the fruits of the yeare now gathered in.

Of Winter.

Winter (the laſt quarter) is called in Latin *Hyems*, which ſeemeth to be deri. the Greek word ὑω, which ſignifyeth to moiſt or wet. His ſigne is Capricorn, into which

which the Sun entreth this year on the 11 day of Decemb. at 46 min. past 2 in the afternoon. The season is like to be cold and wet. I end therefore with this Distick.

Pomadet autumnus, formosa est mostibus Aestas,
Ver prabet flores, sque levatur Hiems.

Of the Eclipses.

Three will be this year five Eclipses, three of the Sun, and two of the *Moon*: whereof one (and that of the *Moon*) will only be visible in our Horison.

It is on *Wednesday* the 21 of January: and begins at 4 a clock in the morning. About five she begins to be totally darkned; and at 36 min. past 6, she recovers some of her light: It will be ended at 40 min. past 7; so that the whole duration of this Eclipse will be three houres, and 40 m. I forbear to make any mention of the other Eclipses, because they are not seen of us in Engl.

A Chronologicall note of some memorable Accidents, shewing how long it is since any of them happened.

6 Dice

On the 27 of *March*, the 22 yeare of our King beginneth, having then reigned 21 yeares compleat.

VIVAT REX.

AMEN

DILAT GREX.

Of the four Cardinall Winds, together with their effects in breeding or bringing Sicknesses.

The East-wind called *Subsolanus*, breedeth in cholerick bodies sharp feavers, raging madnesse, and perilous Apostumations: in winter if is ever cold, it bloweth seldome in the night; and this one thing is proper to it, that if it doe chance to bring rain, it continueth commonly a whole day together.

The South-wind called Auster, is of nature hot and moist, it breedeth corrupt humours, and in hot bodies cramps, giddinesse in the head, or the falling-sickenesse, pestilence, & cruell fevers.

The West-wind called Favonius, is of nature cold & moist, it breedeth Phlegme in moist bodies, it procureth sleep, breedeth Apoplexies, and the like. In the spring it greatly refresheth all things, brings abroad the blood, and the sound humors which lay hid in winter, much refreshing the mind. Howbeit near the end of Autumn when winter beginneth to approach, it then growes churlish both on the sea and land.

The North-wind called *Septentrio*, is of nature cold and dry, it is good against the Pestilence, and yet in cold bodies it breedeth Pluriſies, coughs, gouts, & in some squinancies: yet of all Winds it is held to be wholsomest, although it be the sharpest in our winter months.

Note that what is ſpoken thus of their effects, is meant of their long ſtanding in any of the ſaid quarters.
Know alſo, that a continuall ſtill ſummer, is a ſign of Plague or Earthquake.

Of Blood-letting and ſome other Phyſicall Obſervations.

In youth, let Blood from the change to the firſt quarter,
In middle age from the firſt quarter to the full.
In elder years from the full to the laſt quarter.
And in old age, from the laſt quar. to the change

But know that under the age of 14 and about 56, is not good to bleed at all.

Again, in the Canicular or Dog-dayes it is very hurtfull to take any phyſick, unleſſe there be great need: and indeed neceſsity hath no law. Wherefore in ſuch a caſe, the diſeaſe being deſperate, the cure muſt be adventured.

Take a purgation when the Moon is in Trine or Sextile aſpect with Venus, decreaſing in any of theſe three ſigns, Cancer, Scorpio, or Piſces, and it will be ſure to work the better; becauſe when a moiſt planet in a moiſt ſigne hath ſuch an aſpect, the humours in the body are then ſtirred up and down, and ſo the better purged out. Wherefore in this caſe it cannot be amiſſe to prepare humours by ſomething or other which is laxative: and let this

be

be done whilest the Moon is either in Gemini, Libra, or Aquarius.

Take a vomit that it may work thoroughly, when the Moon is in Aries, Taurus, or Capricorn. And know, that the aspects of the Moon in Saturn, or Mars; or the Moon in Leo, ought to be eschewed in the taking of medicines. Finally, if necessity urge no haste, these observations are expedient: for it is a plaine truth that the change of weather upon differing Aspects, doth greatly change and alter our bodies.

Things good for the eyes.

ALL green colours, cold water, Fenel, the water of white roses distilled, Celandine, eyebright, Cervine, Agremony, Cloves: and for hot eyes the juice of Houseleek softly boyled in the shell of a new laid Egge till it be cleane skummed, is very good.

Things ill for the eyes.

TO look much at red colours, or at fire, to read soon after supper: to eat Garlick, Onions, Radish roots, salt meats, colewoits and pulse: as also to drink Wine that is both thick and sweet. Smoke, Kelwits and dust be very bad: and to anoint the eyes with Bats-blood will clean put them out; according to that old proverb, The blood of a Bat will make a man see as well by night, as by day: which may well be true in him that cannot see at all.

Things

Note that what is spoken thus of the effects, is meant of their long standing in any of the said quarters.
Know also, that a continuall still Summer, is a sign of Plague or Earthquake.

Of Blood-letting and some other Physicall Observations.

In youth, let Blood from the change to the first quarter,
In middle age from the first quarter to the ful.
In elder years from the ful to the last quarter.
And in old age, from the last quar. to the change
But know that under the age of 14 and about 56, is not good to bleed at all.

Again, in the Canicular or Dog-dayes it is very hurtfull to take any physick, unlesse there be great need: and indeed necessity hath no law. Wherefore in such a case, the disease being desperate, the cure must be adventured.

Take a purgation when the Moon is in Trine or Sextile aspect with Venus, decreasing in any of these three signs, Cancer, Scorpio, or Pisces, and it will be sure to work the better; because when a moist planet in a moist signe hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out. Wherefore in this case it cannot be amisse to prepare humours by something or other which is laxative: and let this be

be done whilest the Moon is either in Gemini, Libra, or Aquarius.

Take a vomit that it may work strongly, when the Moon is in Aries, Taurus, or Capricorn. And know, that the aspects of the Moon in Saturn, or Mars; or the Moon in Leo, ought to be eschewed in the taking of medicines. Finally, if necessity urge no haste, these observations are expedient: for it is a plaine truth that the change of weather upon differing Aspects, doth greatly change and alter our bodies.

Things good for the eyes.

ALL green colours, cold water, Fenel, the water of white roses distilled, Celandine, eyebright, Wet vine, Agremony, Cloves: and for hot eyes the juice of Houseleek softly boyled in the shell of a new laid Egge till it be cleane skummed, is very good.

Things ill for the eyes.

TO look much at red colours, or at fire, to read soon after supper: to eat Garlick, Onyons, Radish-roots, salt meats, coleworts and pulse: as also to drink Wine that is both thick and sweet. Smoke likewise and dust be very bad: and to anoint the eyes with Bats-blood will clean put them out; according to that old proverb, The blood of a Bat will make a man see as well by night, as by day: which may well be true in him that cannot see at all.

Things

Things good for the Braine.

TO smell to Camomill, Musk, or red-roses: to wash the temples often with rose-water to eat Sage measurably, to drink wine not overmuch, to keep the body warme, to wash the hands often, to walk and sleep measurably; to eat Mustard and Pepper, and not to be troubled with too much noise.

Things ill for the Braine.

LAte suppers, much sleep after meat, anger, to smell to a white Rose, garlick, onyons, much milk and cheese, to stand long against the sun bare headed, to eat hastily and overmuch, to eat too liberally on any kind of brains, much sweat in labour or travell, and a bolotted practice or dayly course in drinking.

Other Notes fit to be knowne.

NOte that fifty minutes make one houre.
Forty five minutes make three quarters of an houre.
Thirty minutes make halfe an houre.
Fifteen minutes make a quarter of an houre.
Twelve inches make one foote.
Three feet, or 36. inches make a yard.
Three feet 9 inches, or 45 inches make an ell.
Sixteene feet and 6 inches make one Pole or Rod to measure Land withall.
Forty Poles makes one Furlong.
Eight Furlongs make one Mile.

Three

Three Miles make one League.

The compasse of the whole Earth is held to be 21000. and 600. Miles, containing the full & iuſt number of 300 and 60 degrees, each degree being equall to threeſcore Miles.

The Sun in one houre goeth 900. miles, as ſome have demonſtrated: ſo the compaſſe of England is held to be 1538. Miles.

The Longeſt day at London is 16. houres and 30. minutes, at Yorke 17. within 1 min. being 28. minutes longer then at London.

The longeſt day at Cambridge, is 16. houres and 34. minutes, longer by foure minutes then the day at London, and ſhorter by 24. minutes then the day at Yorke.

Obſervations concerning the Weather.

WHen the Sun riſeth clear, and not red, & is red at his ſetting, and when the Moon at her prime (which 3 dayes and 18 houres after the Change) appeares fair and bright, it is a ſigne of fair weather: but if the Sunne at his riſing be very red, or a little after his riſing with clouds, and at his ſetting be overcaſt with a miſt, or goe down behind a cloud; or if the horns of the Moon be blunt, or a blackneſſe appear in the midſt of her, judge of foule weather.

Judgements

Things good for the Braine.

TO smell to Camomill, Musk, or red-roses: to wash the temples often with rose-water to eat Sage measurably, to drink wine not overmuch, to keep the body warme, to wash the hands often, to walk and sleep measurably; to eat Custard and Pepper, and not to be troubled with too much noise.

Things ill for the Braine.

LAte suppers, much sleep after meat, anger, to smell to a white Rose, Garlick, onyons, much milk and cheese, to stand long against your use bare headed, to eat hastily and overmuch, to eat too liberally on any kind of brains, much sweat in labour or travell, and a besotted practice or dayly course in drinking.

Three feet, or 36. inches make a yard.
Three feet 9 inches, or 45 inches make an ell.
Sixteene feet and 6 inches make one Pole or Rod to measure Land withall.
Forty Poles makes one Furlong.
Eight Furlongs make one Mile.

Three

Three Miles make one League.

The compasse of the whole Earth is held to be 21000. and 600. Miles, containing the full & iuſt number of 360 and 60 degrees, each degree being equall to threeſcore Miles.

The Sun in one houre goeth 900. miles, as ſome have demonſtrated: ſo the compaſſe of England is held to be 1532. Miles.

The Longeſt day at London is 16. houres and 30. minutes, at Yorke 17. within 2 min. being 28. minutes longer then at London.

The longeſt day at Cambridge, is 16. houres and 34. minutes, longer by foure minutes then the day at London, and ſhorter by 24. minutes then the day at Yorke.

Obſervations concerning the Weather.

WHen the Sun riſeth clear, and not red, & is red at his ſetting, and when the Moon at her prime (which 3 dayes and 18 houres after the Change) appeares fair and bright, it is a ſigne of fair weather: but if the Sunne at his riſing be very red, or a little after his riſing with clouds, and at his ſetting be overcaſt with a miſt, or goe down behind a cloud; or if the horns of the Moon be blunt, or a blackneſſe appear in the midſt of her, judge of foule weather.

Judgemnes

Judgements of the weather by the sign wherein the Moon shall be at the Change, Quarters, or Full.

IF the Moon doe either change come to the ful, or enter into her 1 or last quarter in *Aries*, *Leo*, or *Sagitarius*, in winter it commonly is fair weather: but in summer immoderate heat, and the hotter if it happen in *June* or *July*. If she change, be at the full or enter into the first or last quarter in *Taurus*, *Virgo*, or *Capricorne*, in winter judge of cold weather: but in summer temperate weather. When the said times change in *Gemini*, *Libra*, or *Aquarius*, judge of much wind, especially in Autumn or the spring if the Moon change, be at the full, enter into the first or last quarter in *Cancer*, *Scorpio* or *Pisces*, in winter it fore-sheweth moist and rainy weather, or snow to follow; but in summer pleasant and temperate weather to ensue. Thus observing observing the foresaid tokens, it will for the most part bring you to the knowledge of the weather.

Observations for Husband-men and others.

IN January take off superfluous branches from fruit-trees, and prepare your ground for Gardens, moreover Tree-roots, cut your Vines in some of the twelve dayes.

Set Quick-sets, Roses, and sallets in the month of February. And now cover up the roots of your trees with good earth, which you opened before in the beginning of January.

In March you may Grafft, but in planting and grafting chuse a warme time: wherefore let not the Wind be in the East or North, because

cause such winds are commonly nipping, especially being beheld by any aspect of the Moone with Saturn or Venus, in cold signes as Virgo, Capricorn, Taurus, Scorpio, Pisces, or Cancer.

In the end of Aprill, or beginning of May, set and sow tender herbes and seeds in your Gardens, in a good temperature of ayre.

If you mean to preserve Flowers or seeds gather them in a full Moon let the Sun shine first upon them and they will keep the better: but let them not be dryed in the Sun, lest the sun drink away part of their vertue.

Remove young trees either in the end of October, November, or February, the Moone increasing: and be sure to set that side North which was south before; because it cannot endure the cold North.

Sheare sheep the Moon increasing, and their fleeces will grow the better again. The like observe for cutting of haire the Moon in Taurus, Virgo, or Libra.

Geld cattel the Moon in Aries, Sagitarius, or Capricorn, being in her last quarter.

Gather all fruits that you mean to keep, in a dry time, when the Moon is at the full.

Sow all such seeds as have round roots (as Onyons, Leeks, Turneps, &c.) either three or foure dayes before the full, or three or foure dayes after the full.
